

• Key Benefits

**Compact and small**

**Big 10,4 touch screen display**

**Tidal Volume from 2 ml**

**High- and low-pressure Oxygen inlet**

**Long duration battery**

**Re-usable flow sensor and Patient-circuits**

## ARIA 104

ARIA 104 has been developed by Siare to manage respiratory diseases. It's a versatile ventilator gathering an exceptional flexibility level with technology and user friendly. It can offer a wide range of operational modes with a simple and intuitive interface adequate for respiratory care of adults, paediatric, neonatal and premature patients. Aria features a big 10,4" touch screen colour display, an accurate and precise monitoring along with immediate feedback on the ventilation delivered to the patient is granted. The ventilator's pneumatic system foresees an advanced low pressure flow generator with a separate cooling system which assures an autonomous operation of the compressed air with a low oxygen consumption employed to mix the Fio2 from 21% to 100%. Thanks to this advanced system, the lung ventilator ARIA 104 can be used also in the wards where there is a lack of centralized medical gases The ARIA 104 is the ideal choice for the ventilatory treatment of tracheostomized, NIV patients with oronasal masks in Intensive Care, Sub-Intensive Care, Pneumology, Emergency, intra-hospital and extra-hospital transport thanks to a series of accessories conceived and realized for an ideal mobility of the ventilator itself.
